

# Bourdon tube pressure gauge

## For the process industry, Monel version

### Models 262.50, 263.50, 262.30 and 263.30

WIKA data sheet PM 02.33

For further approvals,  
see page 6

#### Applications

- For gaseous and liquid aggressive media that are not highly viscous or crystallising, also in aggressive environments
- Oil and gas industry, chemical and petrochemical industries, power engineering and also water and wastewater technology
- Sour gas applications, also with NACE requirement

#### Special features

- With case filling (model 263) for applications with high dynamic pressure loads and vibrations
- Models 262.30 and 263.30: safety version with solid baffle wall (Solidfront) designed in accordance with the requirements of EN 837-1 and ASME B40.100
- Suitability for particularly aggressive media, due to very high corrosion resistance
- EMICOGauge version, to avoid fugitive emissions
- QR code on dial links to instrument-specific information

Bourdon tube pressure gauge, model 262.30, NS 100 [4"]

#### Description

The models 262 and 263 are high-quality Bourdon tube pressure gauges with wetted parts from extremely corrosion-resistant Monel.

The use of high-quality materials and the robust design are geared to applications in the chemical and process engineering industries with particularly aggressive acids or bases. The instrument is suitable for liquid and gaseous media, also in aggressive environments.

Scale ranges from 0 ... 0.6 to 0 ... 1,000 bar [0 ... 10 to 0 ... 15,000 psi] ensure the measuring ranges required for a wide variety of applications.

The safety version is made up of a non-splintering window, a solid baffle wall between measuring system and dial and a blow-out back. In the event of a failure, the user is protected at the front side, as media or components can only be ejected via the rear of the case.

For harsh operating conditions (e.g. vibrations), all instruments are also available with an optional liquid filling.

The QR code on the dial allows instrument-specific information such as the serial number, the order number, certificates and other product data to be retrieved from the internet easily and in the long term.

# Specifications

Basic information	
<b>Standard</b>	<ul style="list-style-type: none"> <li>■ EN 837-1</li> <li>■ ASME B40.100</li> </ul> <p>For information on the "Selection, installation, handling and operation of pressure gauges", see technical information IN 00.05.</p>
<b>Further version</b>	<ul style="list-style-type: none"> <li>■ For oxygen, oil- and grease-free</li> <li>■ Per NACE <sup>1)</sup> MR0175 / ISO 15156, use in H<sub>2</sub>S-containing environments in oil and gas production</li> <li>■ With pre-volume deflagration flame arrester <sup>2)</sup> for mounting to zone 0 (EPL Ga); model 910.21; see data sheet AC 91.02</li> <li>■ EMICOgauge, to avoid fugitive emissions; instrument hook-up with instrumentation valves → See page 10</li> </ul>
<b>Nominal size (NS)</b>	<ul style="list-style-type: none"> <li>■ Ø 63 mm [2 ½"]</li> <li>■ Ø 100 mm [4"]</li> <li>■ Ø 160 mm [6"]</li> </ul>
<b>Connection location</b>	<ul style="list-style-type: none"> <li>■ Lower mount (radial)</li> <li>■ Lower back mount <sup>3)</sup></li> </ul>
<b>Window</b>	Laminated safety glass (NS 63 [2 ½"]: polycarbonate)
<b>Case</b>	
Model 262.50, 263.50	Safety level "S1" per EN 837-1: with blow-out device
Model 262.30, 263.30	Safety level "S3" per EN 837-1: with solid baffle wall and blow-out back
Internal pressure compensation	For scale ranges ≤ 0 ... 16 bar [≤ 0 ... 300 psi] the case can be vented and resealed
Material	<ul style="list-style-type: none"> <li>■ Stainless steel 1.4301 (304)</li> <li>■ Stainless steel 1.4571 (316Ti)</li> </ul>

# EMICOgauge

## Instrument hook-up with instrumentation valves

The EMICOgauge instrument hook-up, consisting of pressure gauge and instrumentation valve, minimises the number of leakage points and thus reduces the risk of media escaping into the environment. In order to guarantee the system's leak tightness, an additional leak test is carried out in advance, for each component.

During mounting, the 360° swivel adapter connection of the EMICOgauge enables quick alignment of the pressure gauge with simultaneous pressure sealing. With this design, maintenance and dismounting of the pressure gauge and valve are also easy. WIKA can guarantee the leak tightness of the assembly for up to 20 mounting and dismounting operations.

There are a very large number of possible combinations of pressure gauges and the attachable valve models IV1x, IV2x and IVM. Since special pressure connections are often required for specific applications, a large number of variants have been defined for the EMICOgauge in order to avoid adapters, which would otherwise be needed, with their 2 additional sealing points.

**EMICOgauge consisting of model 262.30, NS 100 [4"] and mounted instrumentation valve**

### Advantages

- Significantly reduced risk of fugitive emissions, since the version for "fugitive emissions" complies with TA-Luft (VDI 2440)
- Fully tested and ready-to-install solution of an instrument-valve assembly
- Reduction of leakage paths in pressurised systems
- 360° swivel connection (swivel adapter) enables easy replacement and positioning of pressure gauges
- For various applications in chemical and petrochemical plants such as gas processing and production

### Specifications

#### Basic information for pressure gauges

Nominal size (NS)	Ø 100 mm [4"]
Scale range	Between 0 ... 0.6 bar and 0 ... 420 bar As well as corresponding measuring spans for other units and +/- scale ranges
Connection location	Lower mount (radial)

#### Assembly

Mounting type	EMICOgauge connection: 360° swivel connection (swivel adapter) with special pressure sealing Spare part: 5 x seal set consisting of O-ring and support ring; item no. 14525042
Instrumentation valve	<ul style="list-style-type: none"> <li>■ Instrument version of IVM → See data sheet AC 09.17</li> <li>■ Model IV10, IV11 or IV20 → See data sheets AC 09.22 and AC 09.19</li> </ul>

### Special pressure sealing

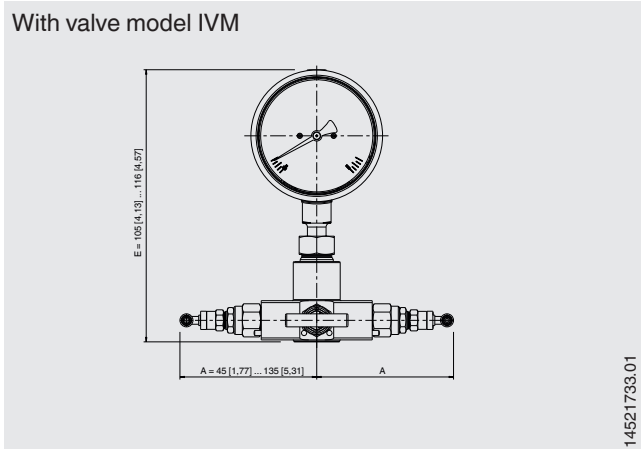

The redundant sealing, consisting of metal-to-metal seat and an additional O-ring seal with support ring, ensures the required leak tightness of the measuring assembly in addition to a long service life.

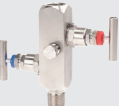

Process connection	
<b>Standard</b>	
Model IVM	<ul style="list-style-type: none"> <li>■ In line with ASME B16.5, RF or RJ</li> <li>■ In line with EN 1092-1, form B1 or B2</li> </ul>
Model IV10, IV11 or IV20	<ul style="list-style-type: none"> <li>■ ANSI/B1.20.1</li> <li>■ EN 837-1</li> </ul>
<b>Size</b>	
In line with ASME B16.5, RF or RJ	Flange ½" ... 2" / class 150 ... class 2500
In line with EN 1092-1, form B1 or B2	Flange DN 15 ... DN 25 / PN 16 ... PN 100
ANSI/B1.20.1	½ NPT, male thread or ½ NPT, female thread
EN 837-1	G ½ B male
<b>Material (wetted)</b>	
Process connection	Monel 400 (2.4360)
Seal	O-ring: FKM; support ring: PEEK

Operating conditions	
<b>Medium temperature</b>	
With pressure gauge without filling	-20 ... +150 °C [-4 ... +302 °F]
With pressure gauge with filling	-20 ... +100 °C [-4 ... +212 °F]
<b>Ambient temperature</b>	-20 ... +60 °C [-4 ... +140 °F]
<b>Leak tightness of the overall system</b>	Fulfills the fugitive emission requirements per TA Luft (VDI 2440), helium tested, leakage rate: $< 1 \cdot 10^{-4}$ mbar l/s

### Examples of EMICOgauge, model 262.30, NS 100 [4"] and mounted instrumentation valve
